

# NEEDS ASSESSMENT ON LGBTI & AGING ISSUES IN SOUTH FLORIDA

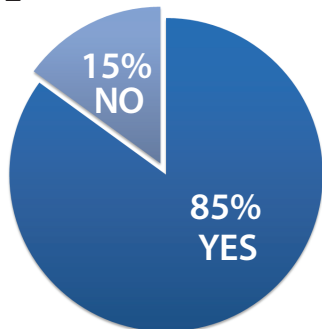

In 2014, Our Fund & SAGE commissioned University of Miami Miller School of Medicine to conduct a survey of agencies and other providers in the Miami-Dade, Broward and Palm Beach Counties. The results indicated that while service providers recognize the need to train employees about aging issues, few perceive the need to train employees about the needs surrounding LGBTI elders.

## Percent of service providers/agencies providing services to the LGBTI community

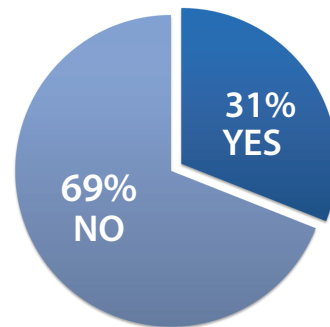

84% of community agencies, 88% of healthcare agencies and 47% of residential agencies for older adults indicated that they provide services to the LGBTI community.

## Percentage of service providers/agencies currently providing any training related to aging and older adult issues

## Percentage of service providers/agencies currently providing any training related to LGBTI issues and concerns

The reason?  
46% report a LACK of perceived need.

**GOOD NEWS! 83%** expressed willingness to provide training to staff on LGBTI issues.
